The ÆNIED, Book I

1.1 Start

Arma virumque cano, Troiae qui primus ab oris Italiam, fato profugus, Laviniaque venit litora, multum ille et terris iactatus et alto vi superum saevae memorem Iunonis ob iram; multa quoque et bello passus, dum conderet urbem, inferretque deos Latio, genus unde Latinum, Albanique patres, atque altae moenia Romae.[39]

1.1.1 Middle

Dixit, et avertens rosea cervice refulsit, ambrosiaeque comae divinum vertice odorem spiravere, pedes vestis defluxit ad imos, et vera incessu patuit dea. Ille ubi matrem adgnovit, tali fugientem est voce secutus: 'Quid natum totiens, crudelis tu quoque, falsis iudis imaginibus? Cur dextrae iungere dextram non datur, ac veras audire et reddere voces?'[39]

1.1.1.1 End

Postquam prima quies epulis, mensaeque remotae, crateras magnos statuunt et vina coronant. Fit strepitus tectis, vocemque per ampla volutant atria; dependent lychni laquearibus aureis incensi, et noctem flammis funalia vincunt. Hic regina gravem gemmis auroque poposcit implevitque mero pateram, quam Belus et omnes a Belo soliti; tum facta silentia tectis: 'Iuppiter, hospitibus nam te dare iura loquuntur, hunc laetum Tyriisque diem Troiaque profectis esse velis, nostrosque huius meminisse minores. Adsit laetitiae Bacchus dator, et bona Iuno; et vos, O, coetum, Tyrii, celebrate faventes.' Dixit, et in mensam laticum libavit honorem, primaque, libato, summo tenus attigit ore, tum Bitiae dedit increpitans; ille impiger hausit spumantem pateram, et pleno se proluit auro post alii proceres. Cithara crinitus Iopas personat aurata, docuit quem maximus Atlas. Hic canit errantem lunam solisque labores; unde hominum genus et pecudes; unde imber et ignes; Arcturum pluviasque Hyadas geminosque Triones; quid tantum Oceano properent se tinguere soles hiberni, vel quae tardis mora noctibus obstet. Ingeminant plausu Tyrii, Troesque sequuntur. Nec non et vario noctem sermone trahebat infelix Dido, longumque bibebat amorem, multa super Priamo rogitans, super Hectore multa; nunc quibus Aurorae venisset filius armis, nunc quales Diomedis equi, nunc quantus Achilles. 'Immo age, et a prima dic, hospes, origine nobis insidias,' inquit, 'Danaum, casusque tuorum, erroresque tuos; nam te iam septima portat omnibus errantem terris et fluctibus aestas.'[39]

Chapter 3

Some Math

This is a triviality, but we include it for completeness.

$$\int_0^\infty f(x)\,dx = \begin{cases} 1 & \text{if } f = \delta, \\ 0 & \text{if } f = 0. \end{cases} \tag{3.1}$$

Here is an aligned set of equations.

$$f(x) = f(x) \cdot 1 \tag{3.2}$$
$$= f(x) \cdot (2 - 1) \tag{3.3}$$
$$= f(x) \tag{3.4}$$

The clever step is (3.3).
